- **Demand Planning** – align vendor purchases with your sales forecast to ensure on-time availability
- **Lot & Serial Number Traceability** – track lot & serial numbers for ISO compliance
- **Designer** – include non-Macola® databases, custom SQL queries, & link multiple screens together
- **Multi-level Bill of Material Report** – pinpoint component shortages by customer or production order
- **MRP Action Report**
- **Supplier Forecast Report**
- **Serial/Lot POP Reporting** – modify the captured bill of material, report production, report scrap
- **Purchasing Spend Report**
- **Report Scheduler** – create and email reports based on a schedule

PULSE Purchase Order Web Portal Improve vendor collaboration with robust web portal - **NEW**

PULSE Purchase Order Manager puts your vendors to work for you by eliminating endless email chains and voicemails. Vendors receive purchase orders via email. Purchase order confirmations, delivery date changes, price changes, etc. are all updated using the web portal. Notes, documents & drawings are included. Fully integrated with your Macola®.

PULSE Sales Order Web Portal Improve customer collaboration with a robust web portal- **NEW**

PULSE Sales Order Web Portal improves customer, sales rep, and distributor collaboration with a web portal system. Customers can key in their orders, monitor status, obtain tracking numbers and sales history. Optional sharing of price lists and inventory availability, Eliminates endless email chains and voicemails. Fully integrated with your Macola®.

PULSE SystemPRO Comprehensive service that speeds up your Macola SQL database

PULSE SystemPRO improves the performance of your Macola® databases by evaluating and optimizing your SQL Server and databases settings. It includes a 92-point list of data integrity checks and data cleanup.

PULSE ARCHIVE Utility Scheduled Data Archiving- # top seller

PULSE Archive utility speeds up your Macola® processing by archiving unneeded data. It automatically removes unnecessary data and moves it to your archive database, per your retention policy. Archived data can be accessed at any time.

PULSE Customer Payments Processing (formerly called PULSE LOCKBOX)

PULSE Lockbox eliminates manual keying of customer remittances by importing your cash receipts from your bank's cash receipt file or remittances from Amazon, Shopify, Wayfair, etc. Lockbox lets you see that each receipt was matched correctly to your accounts receivable file before posting.

PULSE eCOMMERCE Automated Customer Orders Import / Amazon Integration # top seller

PULSE eCommerce eliminates manual keying of customer orders by importing them directly from your website, Amazon, Shopify, Wayfair, web-based EDI service, spreadsheets or text files, etc.
