WHO NEEDS THIS SOFTWARE?

If you need to make a lot of changes or additions to your Macola® inventory item master file or item/location but have been dreading the time it will take to open the screen for each and every item, this utility is for you. Let's say that you want to:
- Change the product categories for 300 items or purchasing lead times for 4,000 items
- Add 200 new inventory items to your file
- Make massive changes to get ready to implement the MRP software
- Increase the selling price of 5,000 items by 5%.
- Add or change customer items
- Add or change vendor items
- Add or change Shop Floor Routings

HOW DOES IT WORK?

Using a familiar Excel spreadsheet with powerful Visual Basic programming, this utility imports and exports data directly from and to your Macola® master files. For the item master and item/location files, we allow you to pick and choose the data fields you want to view (from the list of 200 fields). We also allow you to add new items. It's easy to use, and it saves a lot of your time.
